QUALITY – it's more than a mantra, it's our obsession.

Systems Offering Superior Value Today | Enabled for Future Technology & Applications

SCITON'S COMMITMENT

Founded in 1997, Sciton is a leading manufacturer of advanced, high quality lasers and light sources in the aesthetic medical market. We are committed to providing best-in-class solutions for medical professionals who want unrivaled clinical performance, superior durability, and value, while also providing the most convenient and cost effective systems. The Sciton JOULE is a modular platform that allows physicians to customize the configuration and grow their practice without having to purchase multiple systems. The BBLs Broadband Light stand-alone system includes the SkinTyte module and six pulsed light filters. All Sciton systems incorporate our full commitment to the highest quality from innovative design to handcrafted manufacturing to incredible ease-of-use – all to achieve stunning patient results and provide the highest possible value for our customers.

Quality • Modularity • Durability • Reliability • Expandability • Return on Investment

Sciton's Global Presence

Sciton's Post-Sale Support

As part of our commitment to your success, we provide not only the highest quality lasers, but also comprehensive training on your new laser, clinical application training, and practice marketing support programs. These include:

- **TopFlight™** (U.S. only) – we have partnered with experienced teams of third-party professionals to guide you through the integral aspects of building a cosmetic practice: including business development, marketing strategies, and product training and certification.
- **Practice Support Kit** (U.S. / International) – a comprehensive set of materials to assist you to effectively market applications to prospective patients as you seek to grow your practice.
